

AIR DISTRIBUTION EQUIPMENT

DOOR GRILLE / LOUVRE

Application

Horizontal outside are designed for both intake and exhaust applications. Strong, clean lines enhance the appearance of the building, whether it is industrial, commercial or institutional. Can be installed in masonry, metal panel, poured concrete, wood or almost any wall construction.

Technical Information

Effective anodize protection, moderate pressure drop and long life result from the same design refinements that makes for good looks. The blades fastened to frame with rivet joint.

Construction

The Frames and Blades are aluminium extrusions that are carefully countoured, accurately formed and rigid enough to stay that way.
